Forward-looking statement and Presentation of financial information

Certain statements contained in this presentation may constitute forward-looking information within the meaning of securities laws. Forward-looking information may relate to our future outlook and anticipated events, business, operations, financial performance, financial condition or results. Particularly, statements regarding our financial guidelines, future operating results and economic performance, objectives and strategies are forward-looking statements. These statements are based on certain factors and assumptions including expected growth, results of operations, performance and business prospects and opportunities, which we believe are reasonable as of the current date. Refer in particular to the “Corporate Objectives and Strategies” section in the MD&A of the 2019 annual report and the “Fiscal 2020 Outlook and Financial Guidelines” section of the FY2020 third quarter shareholders’ report for a discussion of certain key economic, market and operational assumptions we have made in preparing forward-looking statements.

While we consider these assumptions to be reasonable based on the information currently available to us, they may prove to be incorrect. Forward-looking information is also subject to certain factors, including Uncertainties and Main Risk Factors which are described in the MD&A sections of the 2019 annual report and the FY2020 third quarter shareholders’ reports that could cause actual results to differ materially from what we currently expect. These factors include risks such as competitive risks, business risks (including potential disruption to our supply chain), regulatory risks, public health crisis and emergencies such as the current COVID-19 pandemic, technology risks, financial risks (including variations in currency and interest rates), economic conditions, human-caused and natural threats to our network, infrastructure and systems, community acceptance risks, ethical behavior risks, ownership risks and litigation risks, many of which are beyond Cogeco’s control. Moreover, the Corporation’s radio operations are significantly exposed to advertising budgets from the retail industry, which can fluctuate due to changing economic conditions.

These factors are not intended to represent a complete list of the factors that could affect Cogeco and future events and results may vary significantly from what we currently foresee. The reader should not place undue importance on forward-looking information contained in this presentation and forward-looking statements contained in this presentation represent our expectations as of July 15, 2020 and are subject to change after such date. While we may elect to do so, we are under no obligation (and expressly disclaim any such obligation) and do not undertake to update or alter this information at any particular time, whether as a result of new information, future events or otherwise, except as required by law.

Presentation of financial information:

FY2018 financials were restated to comply with IFRS 15 and to reflect a change in accounting policy with respect to reconnect costs as well as to reclassify results from Cogeco Peer 1, which was sold on April 30, 2019 as discontinued operations. The impact of the changes in accounting policies are described in note 3 on pages 93 to 97 of Cogeco Communications’ 2019 annual report. Note that FY2017 financials and any preceding years, were not restated for these changes.

IFRS 16 has been applied as of September 1, 2019 using the modified retrospective approach where the comparative period is not restated but the cumulative effect is recognized in the opening retained earnings of FY2020. IFRS 16 eliminates the distinction between operating and finance leases, requiring instead that future lease payments be capitalized and recognized as lease liabilities. As a result, the presentation of expenses between operating expenses, depreciation and financial expenses has changed.

Non-IFRS measures

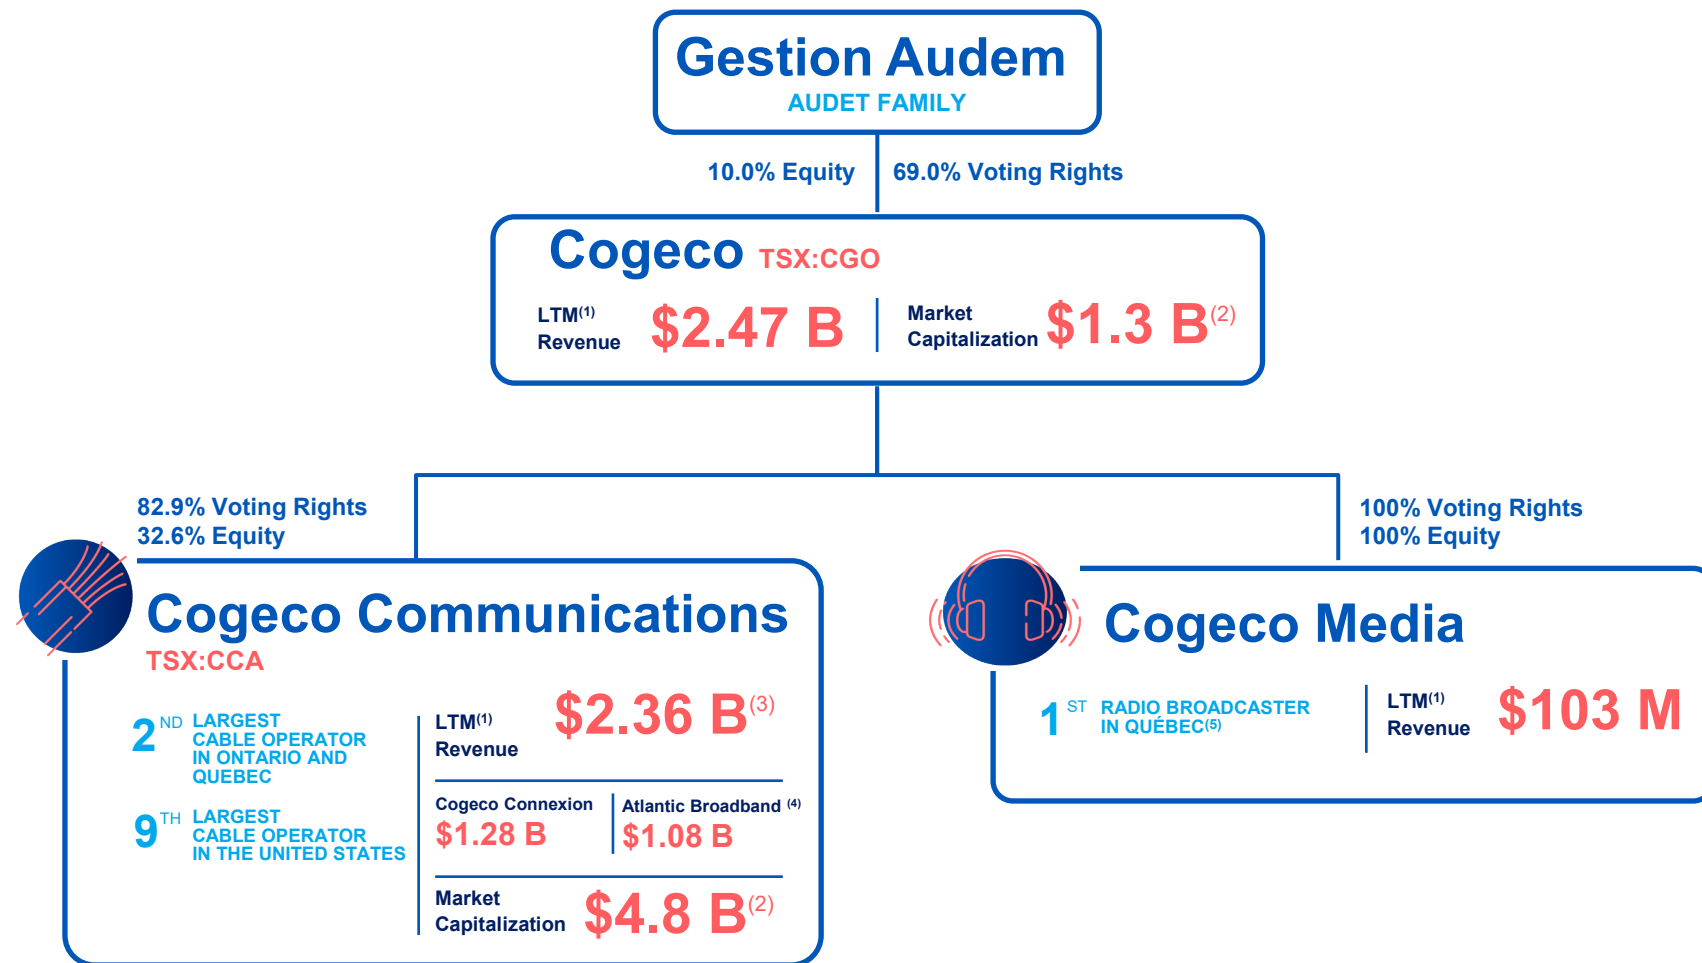

The following non-IFRS measures are used in the presentation and are described on page 30 and 31 of Cogeco Communications' FY2020 third quarter shareholders' report

Free cash flow⁽¹⁾	adjusted EBITDA add amortization of deferred transaction costs and discounts on long-term debt share-base payment gain on disposals and write-offs of property, plant and equipment defined benefit plans expense, net of contributions deduct integration, restructuring and acquisition costs financial expense ⁽²⁾ current income taxes capital expenditures repayment of lease liabilities
Adjusted EBITDA	profit for the year from continuing operations add income taxes financial expense depreciation and amortization integration, restructuring and acquisition costs
Adjusted EBITDA margin	adjusted EBITDA as a % of revenue
Capital expenditures ("CAPEX")	acquisitions of property, plant and equipment. Exclude purchases of Spectrum licenses and acquisition of right-of-use-assets
Capital intensity	capital expenditures as a % of revenue

(1) During the second quarter of fiscal 2020, the Corporation modified the calculation method of its free cash flow in order to reflect how the Corporation analyzes and makes projections of its free cash flow. This modification generates the same result under the current and former calculation, and therefore free cash flow for the comparable periods were not affected by this change.

(2) Excludes the non-cash gain on debt modification related to the repricing of Atlantic Broadband's Term Loan B

Cogeco generates over \$2.4 B in revenue

(1) For the last twelve months ended May 31, 2020

(2) As of July 7, 2020

(3) Includes "inter-segment eliminations and other" but excludes discontinued operations

 - Cogeco's ongoing investments in upgrading and expanding its hybrid fibre coaxial cable network has enabled it to deliver a highly reliable service with minimal additional investments required
- The crisis management teams have implemented the following initiatives at Cogeco Communications, among others, to keep employees and customers safe and ensure a continued level of high quality service:
 - Transitioned virtually all contact center and office employees to work from home
 - Converted customer visits to self-installation and remote repairs in part through the use of new customer-friendly video technology
 - Transitioned most store operations to be handled either on-line, by phone or by mail over the long-term

- Cogeco Media also quickly transformed its radio programming in Quebec to provide all the information necessary to follow developments related to the crisis, doing so in each region of the province
- In the medium term, we intend to capitalize on a number of initiatives which we are implementing through this crisis to accelerate our digital transformation program
- Refer to the FY2020 third quarter shareholders' report for further information on the impacts related to the COVID-19 crisis
